Carlos M. Ramseyer

Ruby on Rails Developer

What I Do

I build any project you want in an agile environment, integrate it with a front-end framework, deploy it and maintain it on the cloud. Always looking for quality and fast delivery using automatic testing and CI technologies. I take proactive action in every project suggesting architectural solutions and helping clarifying partial or undefined requirements.

Experience

Feb. 2019 – Present **Rails Dev**, IT Crowd Argentina. `http://www.itcrowdarg.com`.
I developed and deployed a resources search engine on AWS using Elasticsearch, with multi-level user roles features, asynchronous user notifications and detailed usage charts and statistics in a remote and agile team. American project.

Feb. 2014 – Feb. 2019 **Rails Dev**, Fontela Cristales. `http://www.fontela.com.ar`.
I developed a glass manufacture system from scratch in order to track product manufacturing through multiple factory stages making possible having real time order statuses, completion percentage and centralized information for workers, administrative staff and management.

Sep. 2011 – Feb. 2013 **Tester**, Neoris. `http://www.neoris.com`.
I did manual testing on DirecTV apps as member of a large team distributed among Rosario, Buenos Aires (Arg) and Bogotá (Col).

My Tech Stack

Ruby on Rails, Postgresql, Elasticsearch, Redis, Sidekiq, ActionCable, RSpec, Capybara/Selenium, Webpack, AWS, CircleCI, Ubuntu.

Portfolio

Glass Demo `http://162.243.107.4/` (User: curriculum, Password: cv1234)

Shop Demo `http://18.188.26.246/` (User: linkedin@shopdemo.com, Password: linkedin)

Github `http://github.com/cmramseyer`

Education

2004 – 2013 **Information Systems Engineering**, UTN Rosario.
Incomplete. 85% done.

Languages

Spanish Native.

English Upper intermediate, spoken and written.

Personal Data

Born Date 22/12/1986

Location Rosario, Argentina.
